

# WAGRAM

WHERE GRÜNER MEETS ROTER VELTLINER

© Weinstraße Wagram

A warm welcome to Wagram.

An abundance of loess and limestone. Rich soils and expressive wines with longevity. Bold and intense. Vineyards in gentle hills and rows of vines in close proximity of the River Danube. Inviting yellow-fruit aromas and sappy drinkability. Grüner Veltliner and Roter Veltliner, vineyard to vineyard. Where Grüner Veltliner meets Roter Veltliner.

## WAGRAM WINES OF ORIGIN

Effective from the 2021 vintage, the Wagram unites its regional typicity into the Wagram DAC three-tier pyramid of regional, village and single-vineyard wines.

The **GEBIETSWEINE**, or regional wines, form the basis of the pyramid and underline the versatility and varietal diversity that prevail in the Wagram wine-growing region.

The **ORTSWEINE**, or village wines, are identified by the name of the respective Wagram town or village in connection with the leading grape varieties typical for the region.

The **RIEDENWEINE** classification denote the most specific place of origin from the Wagram. Hence these are single-vineyard wines, that are exclusively produced from the Grüner Veltliner, Roter Veltliner and Riesling white grape varieties. The label should always provide the name of the given single-vineyard site, referred to as the Ried.

The Wagram wine-growing region covers 2,400 hectares of vineyards and is located northwest from Vienna to Krems an der Donau.
